Honeywell Specialty Chemicals Seelze GmbH • Postfach 10 02 62 • 30918 Seelze

Dear Valued Customer,

We would like to inform you that we will be removing the "Ph. Eur" and "USP" parameter from the specifications of our Ethanol grades listed below:

- Ethanol 32221-500ML, SKU 10233204
- Ethanol 32221-6X1L, SKU 10191453
- Ethanol 32221-4X2.5L, SKU 10191454
- Ethanol 32205-6X1L, SKU 10191408
- Ethanol 32205-4X2.5L, SKU 10191410
- Ethanol 41322-1L, SKU 10645542
- Ethanol 32205-5L, SKU 10315651

All products above are currently packaged in PE bottles. Recent investigations have shown that interaction with PE negatively influences the UV spectrum of Ethanol over time.

Moving forward, we will only offer Ethanol in accordance with the analytical requirements of Ph. Eur. and USP in glass packaging. For the 2.5L package size, we have two alternatives available:

- Ethanol 32221-2.5L-GL, SKU 10308710
- Ethanol 32205-4X2.5L-GL, SKU 10191409

Smaller package sizes, such as 0.5L and 1L, will be available shortly, as well as a 2.5 l PE package size with an updated specification.

If you have placed orders for Ph. Eur. USP Ethanol grades in PE packaging, we can provide the option to rebook your orders to glass packaging or cancel them upon request.

Please feel free to contact your account manager or our customer care office if you have any questions regarding these changes. We apologize for any inconvenience this may cause.

Dr. Thomas Scholten, Product Marketing Director, August 28th
